PROFILE

Product designer who builds. 6+ years designing digital products end to end, fully remote since 2020 with teams in France, Italy and Argentina. Currently leading the Global Design System at MoveUp Media, a multi-brand sports media and betting group, and taking designs into code (React, Next.js, TypeScript) with AI coding agents.

EXPERIENCE

MoveUp Media · Senior Product UX/UI Designer

Feb 2025 to present

Paris, France (remote). Multi-brand sports media and betting network across 20+ markets.

- **Put 16 sites and 7 brand themes on one design system** by designing a single token source (primitive, semantic and brand tokens, light and dark) for Core Studio, the group's site platform.
- **Made the design system part of the development team's daily work** by building the GDS Hub in Next.js and TypeScript, where developers preview blocks, copy code and compare brands.
- **Built the internal platform every department now uses**, designing and developing the MoveUp Tools portal and 6 of its 11 apps, including an AI video studio, a brand asset library and a Jira-connected roadmap.
- **Took Lumio, an AI betting analysis app, from idea to launch in Brazil** by designing it end to end, from brand identity to the full app, and working with developers and stakeholders through handoff.
- **Created and led Lebi**, a sports predictions SaaS, from 20+ user interviews to a modular design system, and **cut engineering design questions by about 40%** with clearer handoff specs.
- **Put 5 casino sites in 5 identities on one template set** by designing it once and turning each market into data.

Siciliamia · Team Leader UX/UI Designer

Dec 2023 to Feb 2025

Sicily, Italy (remote). E-commerce: online shops for desktop, tablet and mobile (iOS and Android).

- **Led a team of 3 designers** from research and wireframes to prototypes and handoff.
- **Kept every shop consistent across devices** by creating and growing a shared design system and component library.
- **Aligned stakeholders and art directors on the problem before design** through personas, JTBD, empathy maps and user flows, and proposed simpler builds when a design was costly to implement.

Digital Tie · UX/UI Designer & Frontend Developer (React)

Jan 2020 to Dec 2023

Buenos Aires, Argentina (remote). Digital marketing agency.

- **Designed web and mobile interfaces for agency clients over four years**, and led the branding of their digital identities.
- **Took client projects from design to production code**, building front ends in React, HTML, CSS and JavaScript.
- **Kept each client brand consistent** by running user research and design workshops and maintaining the brand guidelines.

Freelance · Designer & Developer

2019 to 2023

Independent projects, alongside agency work from 2020.

- **Designed and built websites and online stores end to end** for small businesses, starting from their brand identity.

SKILLS

Design systems	Design tokens (primitive, semantic, brand), component library, multi-brand theming, light and dark modes, Figma Variables, documentation, design QA
Product design	UX/UI, user research, usability testing, wireframing, prototyping, user flows, information architecture, onboarding, responsive design, accessibility (WCAG), branding
Design engineering	React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, JavaScript, Git, GitHub
AI	Claude Code, Claude Design, Lovable, AI prototyping, APIs: Anthropic, Gemini, ElevenLabs, Seedance
Tools	Figma, Framer, Jira, Adobe Creative Cloud
Languages	Spanish (native), English (C2, near-native)

EDUCATION

2024	Google UX Design Professional Certificate · Google
2022 to 2024	UX/UI Design and Advanced UX/UI · Coderhouse
2021 to 2023	Full Stack Web Development · Digital House, Frontend Development Industry Training Program · Brainnest
Earlier	Advertising studies · UCES, Buenos Aires
