PROFILE

Product designer who builds. 6+ years designing digital products end to end. At MoveUp Media, a multi-brand sports media group, I'm responsible for the Global Design System and design products from brand to handoff, taking design into code (React, Next.js, TypeScript) to prototype and build internal tools.

EXPERIENCE

- MoveUp Media · Senior Product UX/UI Designer** Feb 2025 to present
Remote (Paris, France). Multi-brand sports media and betting network across 20+ markets.
 - Designed the **Global Design System** behind Core Studio, our multi-site engine: one token source that powers 7 brands, with ToffeeWeb (Everton's longest-running fan site) as its reference build.
 - Built the **GDS Hub** in Next.js and TypeScript, the tool the development team uses every day to preview blocks, copy code and compare brands.
 - Designed and built **MoveUp Tools**, the internal platform every department uses, plus 6 of its 11 apps, including an AI video studio, a brand asset library and a Jira-connected roadmap.
 - Designed **Lumio** end to end, from brand identity to the full app: an AI betting analysis app now live in Brazil, delivered with full handoff and close work with developers and stakeholders.
 - Created and led **Lebi**, a gamified sports predictions SaaS, from research and positioning to a modular design system. Clearer handoff specs cut engineering design questions by about 40%.
 - Designed the **Casino Template Set**, an approved block library that lets 8 casino sites launch with their own brand from one system.
- Siciliamia · Team Leader UX/UI Designer** Dec 2023 to Feb 2025
Remote (Sicily, Italy). E-commerce: online shops for desktop, tablet and mobile (iOS and Android).
 - Led a team of 3 designers from research and wireframes to prototypes and handoff.
 - Created and expanded the design system that kept every shop consistent across devices.
 - Framed problems with stakeholders and art directors through personas, JTBD, empathy maps and user flows, and proposed simpler builds when a design was costly to implement.
- Digital Tie · UX/UI Designer & Frontend Developer (React)** Jan 2020 to Dec 2023
Remote (Buenos Aires, Argentina). Digital marketing agency.
 - Designed web and mobile interfaces for agency clients and led branding for their digital identities.
 - Ran user research and design workshops, and maintained the guidelines that kept each brand consistent.
 - Built front ends in HTML, CSS, JavaScript and React.
- Freelance · Designer & Developer** 2019 to 2023
 - Brand identities and graphic design for small businesses, and later websites and online stores, designed and built end to end.
 - Frontend Development Industry Training Program with Brainnest, Germany (remote, 2023).

SKILLS

Design systems	Token architecture (primitive, semantic, brand), multi-brand theming, light and dark modes, Figma Variables, component specs, documentation, design QA
Product design	UX/UI, user research, usability testing, interaction design, prototyping, information architecture, data-dense UI, accessibility (WCAG), branding
Design engineering	React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, JavaScript, Git, GitHub
AI	AI coding agents (Claude Code), AI prototyping, APIs: Anthropic, Gemini, ElevenLabs, Seedance
Tools	Figma, Framer, Jira, Adobe Creative Cloud
Languages	Spanish (native), English (C2, near-native)

EDUCATION

2024	Google UX Design Professional Certificate · Google
2022 to 2024	UX/UI Design and Advanced UX/UI · Coderhouse
2021 to 2023	Full Stack Web Development · Digital House, React · Coderhouse, React & Redux · Coursera
2005 to 2010	Advertising studies · UCES, Buenos Aires
